The theme of the conference - the Malnutrition in India, increased by 50% since 2013, more than one third of the world's malnourished children live in India. Among these, half of the children under three years old are under weight. The major cause of malnutrition in India is economic inequality. Some part of the population, they are most likely to have often lacks in both quality and quantity. Women who are malnourished are less likely to have healthy baby, nutrition-deficient individuals are more likely to have infectious diseases such as pneumonia and tuberculosis, which lead to a higher mortality rate. Age-related natural disorders like respiratory problem, heart diseases. Cancer and stroke, chronic diseases are very common.

Scientific papers refer to all academic and research subjects in the Conference would be published. We have an eminent panel to enhance the quality of the paper publication. We cordially anticipate your whole hearted participation in the conference to go a long way in promoting logical, rational and evidence-based clinical practice.
